

Agile Project Management

Izi Peled, *PMP*®, *SAFe*® *SPC4*

About the course

Many organization will have to adopt a culture which enables them to be quick in responding to changes and deliver quality products. Some of these organization are adopting Agile mindset as a potential solution. The course will help various professionals to be familiar with the Agile thinking since a lot of Agile organizations will have to recruit professionals who are familiar with this mindset.

The project manager, was and still is a key person in the organization. However, in some cases he becomes a “Servant Leader” who encourages the team to become “Self-Managed”.

The “Agile Project Management” course will cover the project lifecycle in Agile environment and the project manager role.
