

## LAND – Lean Agile Network Diagram Fundamentals

Izi Peled, *PMP®*, *SAFe® SPC4*

### About the course

Most organizations have a problem they are trying to solve and are looking for potential solution to solve that problem:

- Delays in delivery - TTM
- Bad Quality
- Responding to stakeholders changes
- Lack of flexibility
- Huge effort during planning phase

Some of these organizations are looking to adopt Agile as the potential solution for that problem. However, adopting the *Agile* values and principles is not enough, especially when the organization is large and team coordination is required. For that we offer *LAND*, a Lean-Agile framework that was designed by Izi Peled to help organizations accelerate value delivery and reduce process waste. Based on the *Agile* values and principles *LAND* drives organizations to achieve high level of Agility and redefine a culture that encourages excellency that will allow the organization create value within a short lead time. *LAND* is a proven knowledge base that can be adopted by various organizations, from startups to large enterprises.

### Course objectives

The workshop participants will enrich their knowledge about *LAND* framework, its process and building blocks.

The workshop will focus on:

1. Understanding the *LAND* approach and its building blocks
2. Understanding the Project/Product lifecycle in *LAND* environment and how it is managed
3. Working in a hybrid environment
4. Reducing waste in a development process

## Target Audience

Any professional or organization that is considering working in *Agile* environment and have basic knowledge on Agile mindset and approaches

## Prerequisites

Basic knowledge on Agile mindset and approaches

## Agenda

- Lean/Agile approach
- Product Backlog
  - Backlog structure
  - Backlog units
  - Value Vs. Enabler units
  - Organizational Vs. Team backlog
- Lean/Agile requirement containers
  - What is an MMF (Value Unit)
  - What is an MVP
- Agile release definition
- Team Backlog
- LAND Lean/Agile approach
  - Understanding the Lean/Agile process
  - Writing Definition of Start – DoS
  - Writing Definition of ready - DoR
  - Writing Definition of Done - DoD
  - Writing Acceptance Criteria
- MMF Life-cycle in LAND environment
- User story Life-cycle in LAND environment
- Working in a hybrid environment
- LAND Roles & Responsibilities
- LAND ceremonies
- Writing a good backlog
- Splitting Feature and user stories
- LAND process exercise
  - Writing a backlog
  - Splitting backlog to MMF and Stories
  - Sprint planning
  - Project/Release follow-up
- Wrap up
